Plain Labels

Plain, bright white labels produced from FSC certified paper, die-cut and supplied on rolls for use on all thermal transfer printers and direct thermal printers from popular manufacturers such as; Avery, Datamax, Monarch, Novexx, Sato, TEC and Zebra. Our plain paper labels are produced using dust-reduced paper to prolong the life of thermal print heads and are excellent for barcode printing and scanning as good contrast is achieved.

Inkjet Labels

Get superb, professional results from your Memjet, Epson or QLS Kiaro! Inkjet printer using ALS quick drying labels available in high quality, brilliant white Polypropylene (PP) or paper for a gloss or matt finish. Supplied with or without the waste removed ALS inkjet labels are easy to use and give excellent printing clarity with no smudges. ALS can advise you on the latest specialist substrates and adhesives available.

Plain Coloured Labels

Plain, single coloured labels for use with all makes of thermal transfer printer. In a range of standard colours or a specific pantone reference. Plain coloured labels are available in paper or filmic material and can be shaped, perforated or varnished as required. These can be supplied in single width rolls or multiple labels across the width and are ideal for easy product identification, or high impact labelling.

UV Flexo Colour Printed

For exceptionally high-quality print definition. Priced for mid to high volume quantities and is suitable for a huge range of material substrates.

Full Colour Digitally Printed

Amazing photo-realistic print quality and best for low to mid volume requirements or where there are many product variants. Great for food or drink labels, promotions or short run trials. Professional Xeikon printed digital labels, at great prices.

Tactile Warning Triangles

Clear raised warning triangles for the blind or partially sighted to warn of harmful substances by touch. Supplied in various sizes, on clear round labels with or without black registration marks on the backing, depending on the needs of your applicator.

Cover-up with Block-Out Adhesive

Labels with a nice bright white face top but with a dark permanent adhesive which covers up anything it is applied to. Great for correctional over-labelling, suitable for thermal transfer printing or we can print with the artwork of your choice. Strong adhesive prevents label being removed or picked off easily.

Security Labels - with embedded AM, RF & RFID/NFC tags

To trigger an alert or track usage through the supply chain. A wide range of security materials are available that are tamper-evident. Some will break-up if removal is attempted or leave behind a message in the adhesive, such as "VOID", or similar.
