

Thermal transfer ribbons for use with barcode label printers

## Choose your ribbon wisely .....

Choosing the correct grade of ribbon for your printer and application ensures that printed text is sharp and clearly readable - essential when printing barcodes to ensure they are within specification and scan first-time!

ALS offer:

- Thermal transfer ribbons available in black plus a spectrum of colours
- Ribbon grades are matched to your specific label printer and your labels:-
  - Wax – suitable for short-life, shipping labels
  - Wax/Resin – scuff resistant, fast printing with high-quality
  - Resin – chemical and scratch resistant, good for specialist coated labels
- Suitable for Near-edge and Flat head printers
- A wide range of standard widths and lengths to match your label sizes
- Low-friction back coating to protect print heads & extend their life
- No minimum order quantity on standard grades and sizes

RIBBONS

### UK Stock Available for Next Day Delivery

Black ribbons in wax/Resin grades for either flat or near-edge printers delivered next day if order placed before 4pm  
If you let us know the make of your printer and type of label and we'll match the correct ribbon for the job

### Coloured Ribbons

A whole rainbow of coloured thermal transfer ribbons are available. Minimum order quantity for standard colours is only 10 rolls.

Standard wax/resin (Premium Performance) colours are: Yellow, Magenta, Cyan, Light Red, Orange, Brown, Light Green, Light Blue and White

Standard resin (Super Performance) colours are: White, Dark Blue, Light Green and Dark Red.

Custom colours can be made to order.

### Specialist Ribbons

Super premium performance ribbons based on a pure resin content, when used with the appropriate label substrates, will offer the following benefits:

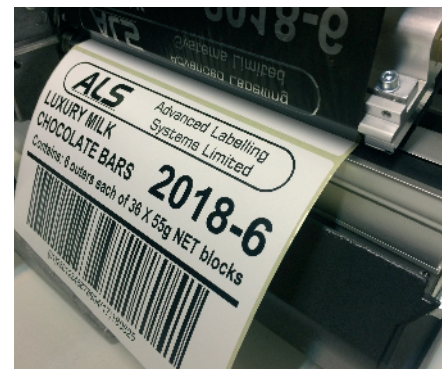

- Extremely resistant to scratching and abrasion.
- High resistance to solvents and other chemicals.
- Suitable for autoclaving and exposure to other high-temperature applications.

We also offer ribbons to give you security that there will be little or no degradation of readability of text, scanning of barcodes or visibility of hazard warning symbols even in the most extreme conditions and over long periods of storage

### For all label printers .....

Avery Dennison, ICE / Videojet, Intermec, Novexx, SATO, TEC, Zebra
